

WILLIAM ANDREAE

New York, NY | (203) 898-2047 | wcandreae@gmail.com | [Linkedin.com/in/willandreae](https://www.linkedin.com/in/willandreae) | machopcodes.github.io

Full-Stack Software Engineer

Certified Software Engineer from General Assembly with extensive experience architecting and deploying secure, scalable applications across diverse platforms. Proficient in delivering end-to-end software solutions using modern front-end and back-end frameworks, focusing on process design, optimizing performance, and elevating user experience. Collaborated with cross-functional teams to transform complex business requirements into intuitive, customer-focused interfaces. Committed to staying abreast of emerging technologies and continuously improving development practices to boost innovation and system productivity.

CORE COMPETENCIES

Full Stack Development | Web Application Architecture | API Development & Integration | RESTful API Design | Code Review & Optimization | Database Design & Management | Data Visualization | UI/UX Design Principles | Infrastructure Automation | Troubleshooting | AI/ML-Driven Feature Development | Software Testing & QA | Performance Optimization | Version Control | Cloud Infrastructure | Leadership & Mentorship | Cross-Functional Collaboration

TECHNICAL SKILLS

- **Programming Languages:** JavaScript | Python | SQL
- **Front-End Development:** Angular.js | TypeScript | React.js | Redux | Next.js
- **Back-End Development:** Node.js | GraphQL | Apache | Perl | Express.js | Django
- **Databases & Data Management:** MySQL | PostgreSQL | MongoDB | DynamoDB
- **DevOps & Version Control:** Git | Jenkins | CI/CD Pipeline | AWS Serverless
- **UI/UX Design:** Figma | Lucidchart
- **Project Management & Collaboration:** JIRA | Scrum | Agile | Oracle SQL
- **Data Analysis & Reporting:** Excel | MS Power BI | SAP | Bloomberg Terminal

KEY HIGHLIGHTS

- Engineered two web applications with optimized, reusable components and conducted in-depth testing and QA, accelerating an application performance by 40% and achieving 100% test coverage.
- Built and maintained a social media management app for iOS, Android, and browser extensions that automated content scheduling and posting for 50 businesses and 500 users.
- Enhanced data transfer efficiency and reduced page load times by over 50%, collaborating with back-end developers to simplify processing and refine payloads.

PROFESSIONAL EXPERIENCE

EQUIFAX (APPRISS INSIGHTS) | St. Louis, KY

Software Engineer

Oct 2022 to Oct 2024

- Collaborated with the product team to transform UI/UX design, incorporating user feedback and aligning modifications with business objectives to maximize usability and increase user engagement
- Onboarded and mentored new engineers, enabling them to adapt to development processes and organizational workflows, elevating team productivity.

HALEY MARKETING GROUP | Buffalo, NY

DevOps Engineer

Aug 2021 to Oct 2022

- Troubleshoot and resolved technical user challenges related to API limitations and cross-platform compatibility, ensuring uninterrupted app performance.
- Introduced and managed a bi-weekly sprint cycle for the CI/CD pipeline, streamlining development, QA, and production deployment processes that boosted team productivity and reduced error rates.
- Delivered intuitive UI/UX designs and wireframes via Figma and hand-drawn sketches while modelling database structures with Entity Relationship diagrams in Lucidchart, which resulted in improved user engagement and enhanced system performance.

LET'S COLLECT | New York, NY

Software Developer (Contract)

Nov 2021 to Apr 2022

- Engineered and integrated a messaging system and dashboards, translating Figma designs into responsive UI pages and connecting them to backend APIs for refined user experience.
- Developed and implemented a step-by-step user onboarding 'wizard' process to streamline account setup and simplify client social media account synchronization.

HIOPERATOR | (Remote)

Software Developer (Contract)

Jun 2021 to Sep 2021

- Co-developed a mobile app with an integrated chatbot using Twilio and GraphQL technologies that enhanced the coordination of front and back loads for truck drivers.
- Built and revamped database tables and views within the mobile app, contributing to improved backend functionality and supporting chatbot-powered logistics solutions.

KITCH | (Remote)

Software Developer (Contract)

Mar 2021 to Jul 2021

- Transitioned a React SPA to a Next.js server-side rendered application in collaboration with developers, resulting in improved SEO and increased organic traffic for commercial kitchen rentals.
- Resolved regional search visibility issues, ensuring users were directed to the correct kitchen rental pages, enhancing user experience and accessibility.

TRED | (Remote)

Software Developer (Contract)

Jan 2021 to Jun 2021

- Optimized the CI/CD pipeline by establishing a consistent deployment schedule that boosted development cadence and team productivity and reduced deployment times.
- Collaborated with UI/UX designers using Figma to integrate pre-designed pages into the platform and implement feature enhancements, ensuring design consistency and improving the overall user experience across the mobile app.

GENERAL ASSEMBLY | New York, NY

Software Engineering Fellow

May 2020 to Aug 2020

- Completed a 12-week, 500+ hour immersive full-stack web development program, mastering front-end and back-end technologies to design and deploy scalable applications.
- Built and managed data-driven applications using modern programming languages, with strong proficiency in SQL for efficient data manipulation and optimization.

FRESHDIRECT | New York, NY

Senior Process Improvement Analyst

Oct 2016 to Apr 2020

- Directed the launch of two departments, managing process mapping, software testing, UX design, and labor forecasting to streamline operations and advance team performance.
- Led a cross-functional initiative to redesign and deploy the order-picking system, boosting plant productivity by 10%.
- Advanced department efficiency by 2% and drove annual savings of \$100K by developing and implementing an interactive productivity tracking dashboard using Oracle SQL and Power BI.
- Delivered Six Sigma-based solutions in collaboration with the ERP team to address operational inefficiencies and maximize system reliability.

HENKEL (SUN PRODUCTS) | Wilton, CT

Demand Planner

Oct 2013 to Aug 2016

- Managed inventory processes, lowering stock levels by 56% from \$170M to \$75M and cutting inventory write-offs by 40%.
- Increased demand forecasting accuracy by 13%, leveraging data-driven strategies and optimizing supply chain operations.

PROJECTS

LLM DEMO APP ([LINK](#))

- Built and deployed a full-stack application with React front end and Python backend, integrating with ChatGPT API for efficient API synchronization and interactive language processing and features.

WINE SALES WEBSITE ([LINK](#))

- Developing a scalable web app for independent wine sales using Next.js, Serverless Architecture, and AWS RDS for sales tracking, focusing on backend setup and frontend design for a functional MVP delivery.

MUSICMAN APP ([LINK](#))

- Engineered a real-time networking platform for musicians leveraging Socket.io, enabling profile creation, seamless messaging, and connection for lessons, jams, and gigs.

EDUCATION

Master in Business Administration (MBA), International Business, University of Connecticut-Stamford (UCONN) | Stamford | May 2017

Bachelor of Science (BS) in Marketing, Miami University | Oxford | May 2013

CERTIFICATIONS

Advanced Java Programming | LinkedIn | 2024

Six Sigma Black Belt (CSSBB) | ASQ - World Headquarters | 2021

Certified Software Engineer | General Assembly UK & Europe | 2020
